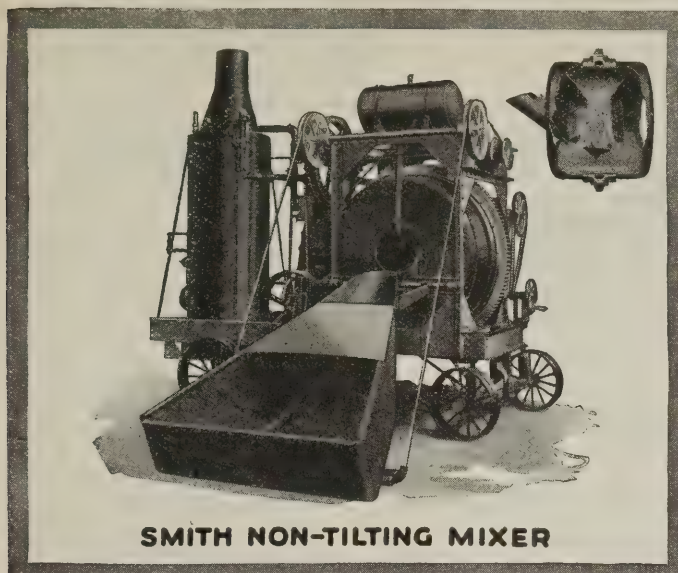
Donley Devices—Donley Inserts

MODERNIZE the new home with the following household devices:

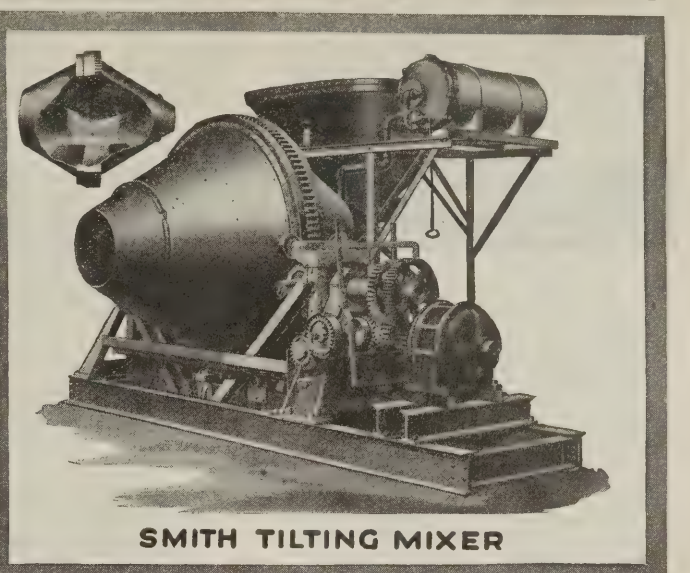
Donley Package Receiver
Donley Fireplace Damper and other fireplace equipment
Donley Meter Box
Donley Rubbish Burner
Donley Garbage Receiver

Send for Catalog illustrating these and other Building Specialties.



SECURE anchorage of fixtures to concrete walls and ceilings calls for a superior concrete insert.

Donley Inserts are of malleable iron, designed after long experience and many tests. They are made to save not pennies, but costly accidents.



Every size of Donley Insert has supporting strength equal to the corresponding size of bolt—⅜ inch, half inch, ⅝ inch, ¾ inch.

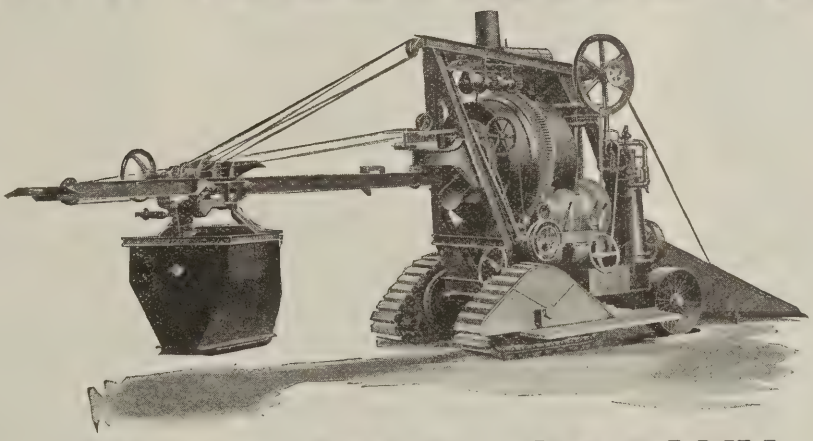
SMITH NON-TILTING MIXER

SMITH TILTING MIXER

— for Value that Endures — BUY SMITH MIXERS

Smith Non-Tilting Mixers are made in the following sizes: (Cu. Ft. Mixed Batch Capacities) 4-S, 7-S, 14-S, 21-S and 28-S. Speedy loading, mixing and discharge insure maximum production. The famous Smith "end-to-center" mixing action guarantees permanent concrete. 17 years of successful service, all over the world. ASK FOR CATALOG 405-A.



Smith Tilting Mixers are made in the following sizes: (Cu. Ft. Mixed Batch Capacities) 10-S, 14-S, 21-S, 28-S and 56-S. The Smith Tilting Mixer is the speediest, most sturdy and most thorough mixer ever designed. Performance records for twenty years unequalled. They are used on world's greatest projects. ASK FOR CATALOG 406.

Furnished as desired, on skids, or on trucks — with steam, gas or electric power — with power loader, low charger, gated batch hopper or standard feed chute.

SMITH PAVING MIXERS PRODUCE PROFITABLY

Road contractors using Smith Paving Mixers are making money. That is the surest recommendation of the equipment.

Smith Pavers are made in these sizes: 10-E, 14-E, and 21-E. Furnished, as desired, with steam or gas power; boom-and-bucket or swivel chute delivery; caterpillar or wheel traction; Smith Automatic Ball-Bearing Derrick Attachment for use with batch boxes.

Smith Paving Mixers are famous for their big production records. Some of the mechanical features which contribute to Smith Paver success are: the double pivoted skip, high drum design, "end-to-center" mixing action, extra speedy discharge.

Investigate Smith Pavers — they are a safe investment.

Concrete Roads must be reinforced

IT IS demonstrated beyond doubt that to make concrete roads proof against heavy motor traffic, weather and time, a fabric of steel must be incorporated in the concrete.

Several Great States Have so ruled

American Steel & Wire Company's Concrete Reinforcement

fulfills every engineering requirement

Covering a Vast Territory

The Southern Architect and Building News covers a vast territory, reaching from Baltimore to Western Texas. The high price of cotton has made this section a larger buyer of building material of all kinds. New houses of all kinds are being built and old ones remodeled. With this one paper you cover a field not covered by any other building paper. It is the most practical advertising you can do. There is no waste. Every reader is a buyer in your line.

Let us quote you rates that will make you think. Your competitor is getting part of this trade. Let us help you get your share. Address:—

Covering a Vast Territory

The Southern Architect and Building News covers a vast territory, reaching from Baltimore to Western Texas. The high price of cotton has made this section a larger buyer of building material of all kinds. New houses of all kinds are being built and old ones remodeled. With this one paper you cover a field not covered by any other building paper. It is the most practical advertising you can do. There is no waste. Every reader is a buyer in your line.

Let us quote you rates that will make you think. Your competitor is getting part of this trade. Let us help you get your share. Address:—

NATIONAL-CLEVELAND
INTERCHANGEABLE COUNTERBORES

prove how easily and with what advantage thrift may be practiced in the small tool field.

The National Patent Counterbore is made in three parts —only the cutter (one-quarter of the whole tool) being of high-speed steel. The shank and pilot are made of more durable and less expensive steel—a clear saving of 75 per cent on the initial investment.

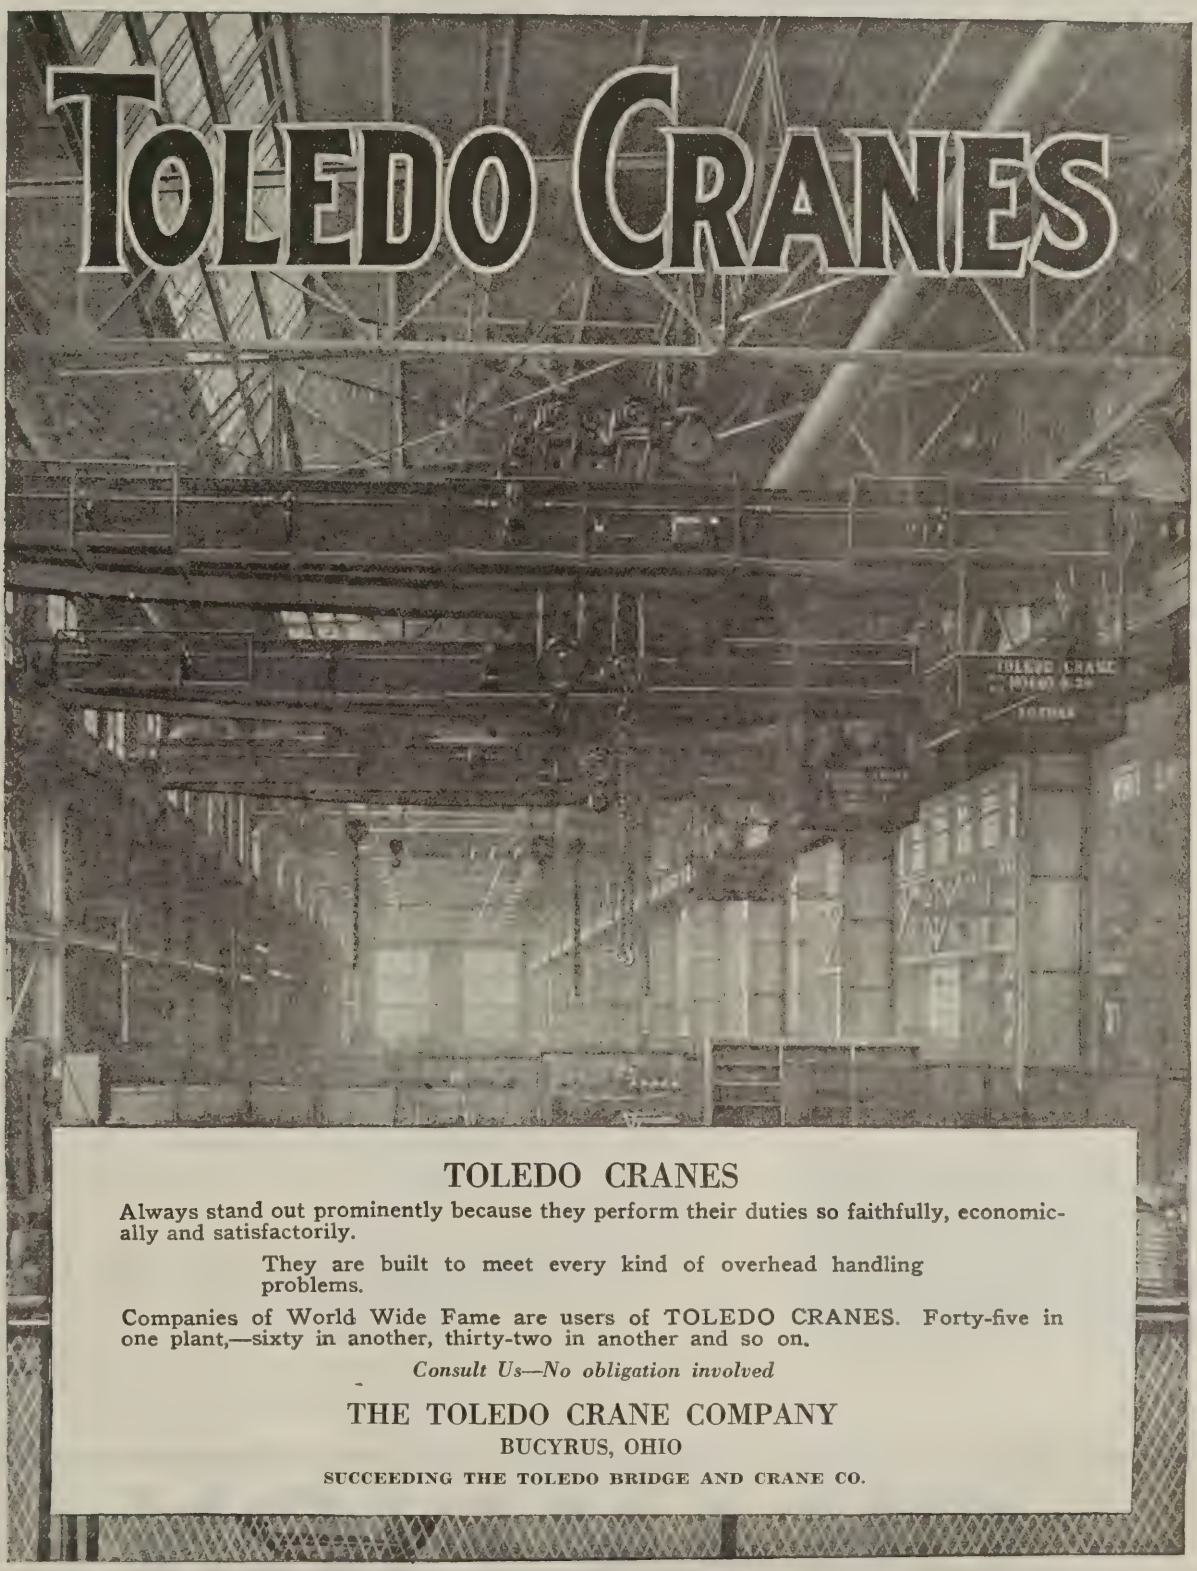
OHIO LOCOMOTIVE CRANES



Builders of Locomotive Cranes for magnet, grab bucket and hook work.

To do yard, erection, lumber, construction, pile driving and cargo handling work.

To switch and haul cars.

For use by railroads, industrial plants, contractors, stevedores, steel mills, scrap dealers, mines and all handlers of bulk material.

LOCOMOTIVE CRANE COMPANY
BUCYRUS, OHIO

TOLEDO CRANES

Always stand out prominently because they perform their duties so faithfully, economically and satisfactorily.

They are built to meet every kind of overhead handling problems.

Companies of World Wide Fame are users of TOLEDO CRANES. Forty-five in one plant,—sixty in another, thirty-two in another and so on.

THE TOLEDO CRANE COMPANY

BUCYRUS, OHIO

SUCCEEDING THE TOLEDO BRIDGE AND CRANE CO.

The Building of a Champion

The first Champion Crane was built five years ago by crane engineers of more than thirty years' experience.

It was their desire to simplify and refine crane design that gave birth to the Champion. They knew the pitfalls of the past that should be avoided, and their ideals of simplicity, accessibility and interchangeability in the Champion design has brought it in four years to the foremost rank.

Skilled mechanics work here in a daylight plant and live in comfortable, well-built homes; many of them erected by the Champion Engineering Company. They take pride in their work and the product shows it.

Our Engineering Department furnishes cost cutting data before you order. Our Service Department assists you in keeping your cranes working at highest efficiency after you order.

We'll be proud to send you the list of enthusiastic Champion Crane users.

Section of Shepard Electric Traveling Crane

Shepard design recognizes the imperative importance of adequate provision for thorough automatic lubrication, permanent alignment, by means of the *Balanced Drive*, complete enclosure and accessibility.

The brakes are of the multiple disc type and together with the gearing operate in a bath of clean oil, completely protected from dirt. Gears are cut from steel blanks. Experienced engineers are willing to offer intelligent advice and co-operation. Shepard Cranes are made in capacities of 1 to 50 tons.

APPLICATION OF BUFFALO TRACTOCRANE TO HANDLING COAL FROM CARS TO STORAGE

Makers of the Famous Buffalo Bucket

Use a Tractocrane to Stock Coal

Why not use a locomotive crane to handle coal instead of *a derrick* and hoisting engine? It does the work quicker, better, cheaper and has the advantage of portability.

Write today for complete price and specifications. We will gladly send more information about this economical Buffalo Tractocrane.

TRACTOCRANE SPECIFICATIONS

Operates a 1-yd. Buffalo Bucket. 30-ft. radius. 35-ft. boom. Full revolving. Self-propelling. Mounted on traction wheels or standard gauge R.R. trucks. Maximum load 16,500 lbs.

KINNEAR ROLLING · DOORS

are perfectly balanced, therefore, are easy to operate.

Made of heavy interlocking steel slats, and when dented or broken by an unusual accident, can be quickly replaced by new ones without having to dismantle the door.

Kinnear Doors are made not only for service purposes, but can be made to meet all requirements of the National Board of Fire Underwriters.

Our Engineering Department is at your service. Write for catalogue.

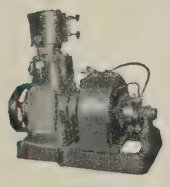
On these pages are shown products representing some of the many lines built by the General Electric Company. Throughout this index references to G-E products will be found which include practically every appliance used in the generation, transmission, distribution and utilization of electrical energy.

CURTIS STEAM TURBINES

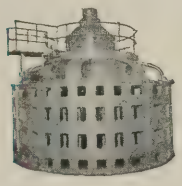
The Curtis steam turbine as manufactured by the General Electric Company gives reliable service and a low cost of operation. Built in sizes of 10 kw. upward for d-c. gen-



erators and 100 kw. upward for a-c. generators. A special form of this turbine is widely used for driving centrifugal pumps, blowers and like apparatus.

AUTOMATIC STATION EQUIPMENT

G-E automatic switching equipment offers an opportunity for new economies in the generation, control and distribution of electrical energy. More than 100 automatic stations are now operating. They show automatic switching equipment to be successful in such applications as the control of synchronous converters, motor generator sets, synchronous condensers, hydroelectric generators and battery charging sets. Bulletins 47730 and 40604 give further information.



ENGINE DRIVEN GENERATING SETS

Direct-connected steam engine driven sets designed to meet the severe conditions of marine work. Used also for small power plants and for lighting construction operations requiring 72 kw. or less. Light, compact and durable. Built with either a-c. or d-c. generators. Bulletin 42300.

ELECTRIC GENERATORS

Belt driven generators in capacities from a fraction of a horse power to 300 kw., standard voltages. G-E waterwheel driven units range from 30 kv-a. to 40,000 kv-a. Bulletin 40600 gives information on 30 to 625 kv-a. sizes. Also generators for connection to steam engines. Bulletin 60011 describes the d-c. units, 25 to 400 kw. Write the nearest G-E office for other information.

SWITCHBOARDS

G-E switchboards are built for all systems of electrical distribution. Safety enclosed switchboards, removable truck, dead front

and draw-out types, have been developed to provide safety to life, reduce fire risk and give greater continuity of service. Standard unit panels are designed for assembly in different combinations to form a complete board. Bulletin 47001A.

FLOW METERS

G-E flow meters measure accurately the flow of steam, water, air, gas or oil through pipes. Made indicating, recording and integrating; all three types are also combined in one meter. Described fully in Bulletin 46501C. Send for Booklet B3464, "A Guide to Boiler Economy."

ELECTRICAL INSTRUMENTS

A complete line of indicating and recording instruments. Switchboard meters, round and horizontal edgewise pattern; frequency, power-factor and synchronism indicators; etc. Portable voltmeters, ammeters and wattmeters. Bulletins available on different types.

OIL CIRCUIT BREAKERS

The General Electric Company has on the market complete lines of oil circuit breakers to meet a great variety of service requirements. They are liberally designed and strong in construction. Made in sizes from the smaller industrial types, as shown, up to 220,000-volt breakers for high tension systems.

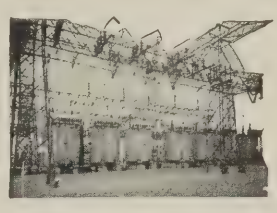
AIR CIRCUIT BREAKERS

Circuit breakers for all kinds of railway, industrial and building service. Furnished mounted on G-E switchboards or may be purchased separately. They are approved and listed by the Underwriters' Laboratories, Inc., and will carry full loads continuously without exceeding the heating rules specified in the Standardization Rules of the A.I.E.E.

LEVER SWITCHES

The complete line of G-E lever switches is made to meet the requirement of the National Board of Fire Underwriters. Made single- or double-throw, one to four poles.

Safety enclosed lever switches, externally operated as shown, made from 30 to 600 amps. Group mounting of these switches, making an enclosed switchboard, provides ideal central control for a number of feeder circuits. Bulletin 67381A.



HEADLIGHT GENERATOR SETS

A 500-watt Curtis steam turbine generator set for steam locomotive headlight service. Used also for industrial applications such as lighting steam shovels, derricks, wrecking cranes, launches and tugboats. Made for two voltages and for operation on different boiler pressures depending on class of service. Bulletin 42014A.

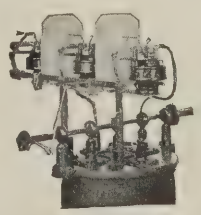
TRANSFORMER SUBSTATIONS

A useful adjunct to the operation of transmission and distribution systems for taking power from a high tension line. Used even in severe climates. Possesses economic ad-

vantages over indoor substations which require considerable expenditure to house in the equipment. A large station with water-cooled transformers is shown. This company makes complete substation equipment, sold either assembled or separately for assembly by customer. Bulletin 47706-A

TRANSFORMERS

G-E power transformers of many thousand kv-a. capacity are now in successful service. Information on the distribution type, as shown, is given in Bulletin 45110A. Special transformers are made for bell ringing, sign lighting, insulating, X-ray apparatus, all-nite-lites, toy operation, etc. Also constant current transformers for street lighting—station type and pole type.



VOLTAGE REGULATORS

Generator voltage regulators, a-c. and d-c., designed for panel, bracket and pedestal mounting. Feeder voltage regulators, hand or motor controlled, for standard single-phase or polyphase circuits, for indoor and outdoor service and for pole mounting. Motor operated regulators can be made automatic by addition of certain auxiliaries. All types are described in Bulletin 45450, mailed on request.

LIGHTNING ARRESTERS

Arresters and choke coils for protection of all kinds of service: Aluminum cell and oxide film types for large a-c. stations, Bulletins 45601A and Y1441A; magnetic blowout and d-c. aluminum arresters for railways, Bulletin 44712; graded shunt resistance and compression chamber multigap arresters, Bulletin 45603A; vacuum tube arresters for signal circuits, Bulletin 45600A, and horn gap type, Bulletin 45602.

SYNCHRONOUS CONDENSERS

Synchronous condensers for power-factor correction and also for power-factor control. Standardized complete line described in Bulletin 41311. Partial list of G-E installations appear in Bulletin 41312.

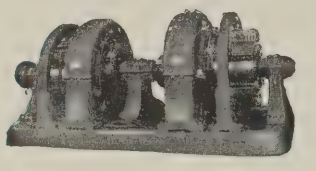
General Electric Company

General Office Schenectady, N.Y.

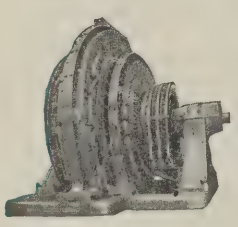
Sales Offices in all large cities

STATIC CONDENSERS

G-E static condensers for improving power factor are especially advantageous for capacities of 500 kv-a. and below. They have low losses, require practically no attendance, and have long life due to absence of moving parts. Standardized for circuits ranging in frequency from 40 to 125 cycles, in voltage from 220 to 2300 volts, and in capacity from 30 to 300 kv-a. Bulletin 49714B.



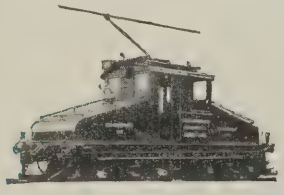
MERCURY ARC RECTIFIERS



Series mercury arc rectifier sets for operation of series luminous arc lamps. Also mercury arc rectifiers for home or public garage battery charging, or for charging signal or telephone batteries, and for motion picture machine arc lamps. Furnished for single-phase and polyphase circuits of standard voltages.

MOTOR GENERATOR SETS

Sets made up of d-c., a-c., or both a-c. and d-c. machines, including arc welding, battery charging, balancer, booster and electrolytic sets, frequency converters and sets for railway lighting and exciter service. Bulletin 42552A.



SYNCHRONOUS CONVERTERS

G-E synchronous converters are used extensively by railways, electric light and power plants, large industrial projects and electro-chemical operations. They are built up to 5300 kw. continuous capacity or larger sizes if desired. Bulletin 42500.

ELECTRIC LOCOMOTIVES

Locomotives for heavy main line freight and passenger service, switching duty, and mine and industrial haulage. Storage battery locomotives can be furnished to operate

also from a trolley if desired. Applications of G-E industrial electric locomotives in various industries are illustrated in Bulletin 44251. For particular information on any type address the nearest G-E sales office.

AIR BRAKE EQUIPMENTS

Equipments for all classes of electric railway service. Described in bulletins as follows: Straight air, Bulletin 44564; straight air with emergency feature, Bulletin 44555; variable release, Bulletin 44565; combined straight and automatic, Bulletin 44551.1.

ELECTRIC HEADLIGHTS

G-E electric headlights can be furnished for electric railways, both traction service and mining locomotives, and also for steam roads. The arc type is described in Bulletin A4061, incandescent type in Bulletin 43800. The mine locomotive headlights are built with special features necessary to give long life in this service.

RAILWAY LINE MATERIAL

A complete line of devices for overhead trolley systems and track return, including pole brackets, suspensions and ears of many types, strain and feeder insulators, splicing sleeves, trolley frogs and crossings, section switches and insulators, turn buckles, rail bonds, bonding tools, etc. Sherardizing is the standard finish. Bulletin 44004A.

RAILWAY SIGNAL ACCESSORIES

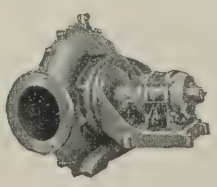
For railway signal work the General Electric Company makes lightning arresters, enameled resistor units and battery charging apparatus, and turbine generator sets for locomotive headlights, cab and car lighting. Address the nearest G-E sales office for information.

ELECTRIC MOTORS

The General Electric Company builds standard motors ranging in sizes from 1/200 h. p upward to several thousand horse power, also special types for special applications. Complete control equipment can be furnished with motors for any duty. When requesting information state service required. Descriptive bulletins available on many different types.

MOTOR CONTROL EQUIPMENT

All auxiliary equipment for control of motors—starting rheostats, speed regulators, controllers, automatic starters, compensators, solenoid brakes, safety switches, accessories for remote control, etc. Descriptive bulletins or other information available on request.



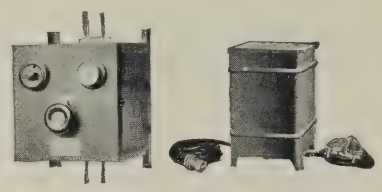
This company is prepared to make up equipment often desired automatic and to coordinate it to accomplish special purposes. An example is the Scherbius system of control for steel mill motors, which the General Electric Company has developed for regulating large induction motors above, as well as below, synchronous speed.

INSULATING MATERIALS

Materials developed from careful research made primarily to meet the requirements of G-E products are offered to others for general electrical repair work. Include varnishes, japans, oils, sealing compounds and paints. Bulletin 48704. Fabrics, including treated fibers, and papers, asbestos tape and treated cloths are described in Bulletin 48715.

CENTRIFUGAL COMPRESSORS

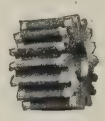
G-E centrifugal compressor or blower sets are induction motor or steam turbine driven. Designed for large volumes and low pressures. They are made in single-stage and multi-stage types in various sizes. For general description send for Bulletin 48609. Foundry applications described in Bulletin 42800; gas plants, Bulletin 48600; blast furnaces.



BATTERY CHARGING EQUIPMENT

All apparatus necessary for the operation of storage battery locomotives, industrial electric trucks and tractors, and other storage battery propelled vehicles — rectifiers of the Tungar and mercury arc types, motor generator outfits, including individual charging sets, starting and lighting battery charging sets and multiple battery charging sets, and switchboards for any number of charging circuits.

TUNGAR BATTERY CHARGERS



Tungar battery chargers, for operation from a-c., can be furnished for garage or private use. They are simple, light in weight

and self starting. Made in four sizes: 12 amp., 75 volts, Booklet B3585; 6 amp., 75 volts; 5 amp., 30 volts, Booklet B3529; 2 amp., 7.5 volts.

GEARS AND PINIONS

Because of their noiseless operation, long life and high tooth strength, Fabroil gears, which are made from cotton, are applicable to machine tools, traveling cranes, and other heavy machinery, as well as automobile timing gear trains. (Bulletins 48703A and 48711.)

Fabroil Gear

G-E steel railway motor gears and pinions are suitable for various classes of service. Described in Bulletin 44419.

This company manufactures herringbone gears for high-speed turbine or motor drive for both naval and merchant vessels, and also speed-reducing gears for driving electric machinery, pumps, etc., and gears for high-speed blowers and compressors.

ELECTRIC ROCK DRILLS

Fort Wayne electric rock drills are extensively used for tunneling, mining and quarrying. Operated by a fully enclosed splash proof motor. Power consumption is only 1½ to 2½ h. p. Can be mounted on tripod mining column, gadder post, shaft bar or quarry bar, and can be handled by two men. Bulletin 48902.

VENTILATING FANS

G-E exhaust fan outfits in 12½-in. to 48-in. sizes with a-c. or d-c. motors. Well adapted for ventilating shops, factories or office buildings and where it is desired to remove dust or smoke. Bulletin 41801.

RESISTANCE UNITS

This company builds grid, ribbon and resistance tube types of resistance units and resistors of various kinds used for industrial heating equipment and for use in motor control apparatus.

ELECTRIC FANS

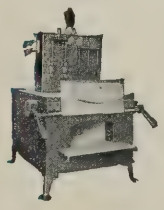
G-E standard electric fans for use on a-c. or d-c. circuits are made oscillating or non-oscillating in 9-in., 12-in., and 16-in. sizes. The a-c. types are made for 110 or 220 volts, standard frequencies, Booklet B3596. Direct-current fans heavily enameled, with blades and cage thoroughly lacquered, are built specially for marine service. Furnished in non-oscillating types for any popular voltage.

ARC WELDING EQUIPMENT

Both single and multi operator equipments to be operated from any standard a-c. or d-c. circuit or by mechanical drive. Bulletin

48932A. Automatic welder to be used as a machine tool for building up surfaces, can be operated from the welding generators or any constant-voltage d-c. source of power. Booklet 3575. Also resistor type sets principally for electric railway work.

ARC FURNACE EQUIPMENT

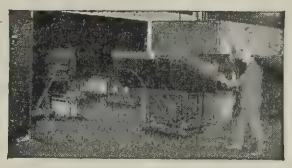


The General Electric Company makes an electric furnace with automatic control for melting non-ferrous metals and alloys and also electrical equipment for all types of electric arc furnaces. This equipment in-

cludes tilting and electrode motors, automatic electrode regulator panels, motor operated switches, voltage regulators, special cables, transformers and reactances, etc. Described in Bulletin 48710A.

ELECTRIC HEAT-TREATING FURNACES

The G-E electric muffle furnace is used for heat treating carbon steel, experimental purposes, etc. Described in Bulletin 69706. G-E electric heating equipment with automatic control has been developed for heat-treating furnaces using temperatures up to 1800 deg. F. Described in Bulletin 69705. Heat-treating problems should be referred to the Industrial Heating Specialists in the nearest G-E sales office.



ELECTRIC GLUE POTS

G-E electric glue pots are being successfully used in wood shops, binderies, etc. Water-jacketed type for quick heating on intermittent service. Jacketless type for continuous duty. Furnished with connection plug and cord for attaching to lamp socket. Bulletin 69100.

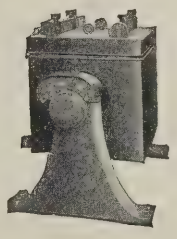
ELECTRIC OVEN EQUIPMENT

Electrically heated baking and drying ovens are efficient, clean and easy to operate and they reduce fire hazard. Described in

Bulletin 48709. G-E electric oven heaters are made for wall, floor, and either wall or floor mounting. Hand or automatic control panels for d-c. or a-c., three-phase or single-phase can be furnished. Bulletin 48012A.

G-E PYROTIP

An electric lead burner which facilitates storage battery repairs, removing connections, renewing posts, etc., also for almost any form of soldering work especially in out-of-the-way places. Operates from the ordinary 110-volt a-c. circuit and requires about the same amount of current as a flat-iron. Several points of advantage are given in Booklet B3586, mailed on request.



ELECTRIC RIVET HEATERS

Electric rivet heaters are efficient, portable and self-contained. They eliminate fuel waste, smoke and gases and reduce fire hazard—disadvantages of the old methods of heating. The G-E rivet heater can be used on any commercial a-c. voltage, standard frequencies.

ELECTRIC SHERARDIZING MACHINES

Electric sherardizing—heating in the presence of zinc—renders metal non-corrosive. Articles so coated may be bent, swaged or otherwise deformed at ordinary room temperature without injury to the coating. Send for Bulletin 48926 for further information regarding this process.

ELECTRIC SOLDERING APPARATUS

G-E soldering irons are made in various sizes. Booklet 3571. For moderate and

heavy duty work using soldering copper the G-E soldering iron furnace is desirable. Made for 110 and 220 volts. Described in Bulletin 69702.

WIRING DEVICES

There are 3000 different G-E wiring devices to meet every wiring requirement. Only material of the highest grade is used in manufacture. G-E Specialties Catalogue Y-1270 gives information on the complete line.

WIRES AND CABLES

G-E wires and cables are submitted to a thorough pressure and insulation test before shipment. Made with protection for marine, mine, or other service. A standard line of cable connecting devices is also manufactured. General information is given in Bulletin 49305.

ELECTRIC LAMPS

The General Electric Company manufactures a complete line of incandescent and arc lamps which meet the needs of street, industrial, store and home lighting. Special lamps to withstand vibration and for headlights and decorative uses.

FLOODLIGHT PROJECTORS

These are successfully used for lighting arsenals, building fronts, docks, freight handling at terminals, factory exteriors, quarries, railroad yards, men on patrol duty, playgrounds, etc. Further information on G-E types given in Bulletin 43850B.

ELECTRIC SEARCHLIGHTS

G-E searchlights, suitable for night work in mines, railroad yards, construction work and for marine use, are made in two types: 1000-watt, 18-inch incandescent lamp and the arc lamp type made in 9-in. to 60-in. sizes. Arranged for pilot house, hand, rope and electrical control. Bulletin 43856A gives detailed information.

LIGHTING FIXTURES

G-E Novalux units are designed for use with the MAZDA lamp. The pendent type is particularly suited for illumination of streets, large interiors and exteriors. Ornamental units are made for all standard lighting units and all candle-powers. Further information is given in Bulletin 43503B.

LABORATORY PRODUCTS

Various devices and substances have been developed in the interest of science and industry by the Research Laboratories of the General Electric Company. They are offered for sale as they may prove to be of value to investigators. Some of these are "Genelite," a self-lubricated metal for light duty bearing purposes; Water Japan, non-inflammable; Kenotrons, high voltage d-c. rectifiers; Boroflux, a deoxidizer; high-vacuum pumps.

SMITH EXCAVATOR AND LOADER

—PLOWS, DIGS, HAULS AND LOADS WORKS AT STREET LEVEL

YOUR money-making possibilities with a Smith Excavator and Loader are enormous. The machine plows, digs, hauls and loads faster and cheaper than 20 men. Costs a fraction of price of steam shovel. Eliminates use of snatch teams. Works at street level and loads at street level. Full capacity loads always, with no danger of getting stuck with wagons or trucks. Adapted to excavating for basements, digging and loading at sand and gravel pits, cut-and-fill road work, loading at material yards, etc.

EXPLOSIVES (All Kinds)

RED CROSS EXTRA 20--60% DYNAMITE—Our most popular brand is similar in its action to the Du Pont Extra dynamite, but is low freezing. It is admirably suited to work in soft rock, in hard rock where it is not desirable to shatter the material, in sand, clay and excavations of every kind. It works extremely well in mining soft ore where there is not much water. It can be used in close work with much more comfort than Straight dynamite, as the fumes are not so objectionable. It is an all-year-round explosive for general purposes, but should not be used in wet bore holes unless the cartridge wrappers are not cut or broken and the charge not left too long in the water.

DU PONT GELATIN 30-75% DYNAMITE has in a great measure replaced other brands of gelatin dynamite because it combines all their virtues of density, plasticity, water resistance, comparative freedom from obnoxious fumes, and in addition, is low freezing. It does not freeze or lose its efficiency unless exposed to very low temperature for a prolonged period. It is used to advantage in every kind of work to which gelatin dynamites are adapted. It is suited to a wider range of work than any other high explosive.

It is especially suitable for close work of every kind, mining and tunneling in the hardest rock under most adverse conditions. The fact that in mining operations thawing is generally unnecessary gives a feeling of safety to the mine operators which they have never enjoyed before this explosive was used.

DU PONT STRAIGHT 25-60% DYNAMITE is a very quick and powerful explosive. It resists water well and is recommended for open work in hard, tough material where a shattering action is desired. It is excellent for mud-capping, scrapping boilers and machinery. It is low freezing. The fumes are such that it should not be used in close work. It is somewhat more sensitive than the other types of high explosives. It is the only grade that can be used in propagated ditch blasts.

RED CROSS GELATIN 35-90% DYNAMITE is low freezing. It can be used in close work the same as Du Pont Gelatin or Repauno Gelatin, but the character of its fumes are somewhat different. It is not to be understood that they are better in any way, but it sometimes happens that miners accustomed to one kind object to the other. The nature of the material worked also has an effect on the fumes, and it often happens that where one kind of gelatin gives objectionable fumes, the other is free from this objection. Red Cross Gelatin is dense, plastic and water resisting.

DU PONT EXTRA 30-60% DYNAMITE is not so quick and shattering in its action as Straight dynamite, but has more of a heaving and lifting effect. It is better suited for soft materials and for close work than Straight dynamite, because its fumes are not so objectionable. It is not low freezing and it does not resist water very well, so the cartridges should not be slit nor left long in wet bore holes.

REPAUNO GELATIN 35-75% DYNAMITE is the well-known standard gelatin dynamite. It is a dense (heavy) plastic explosive, highly water-resisting, and gives a minimum of fumes on explosives. It is low freezing. Gelatin dynamites are used in very wet work, under water, and in close work, where ventilation is deficient. For tunneling and for mining hard rock in wet places gelatin dynamites are unsurpassed. They do not work well unless strongly confined and are unsuitable for such work as mudcapping.

DU PONT BLASTING GELATIN 100% is the strongest and quickest high explosive manufactured. It can be used in close work as it gives a minimum of fumes when exploded. It is practically waterproof, and hence can be used in all kinds of wet or submarine work. It is not low freezing and must be thawed when frozen before using to obtain good results. It must be handled carefully when frozen, because when in this state it is sensitive to shock, while in a thawed condition it can be handled as safely as any other high explosive.

It is especially adapted to blasting hard material in tunnels, submarine blasting, shaft sinking and in places where considerable water is encountered.

DU PONT STUMPING POWDER is a low-freezing dynamite especially adapted to stumping requirements on the West Coast. It does not stand water well, hence cartridges should not be slit or left long in wet bore holes.

REPAUNO STUMPING POWDER is an explosive similar to Du Pont Stumping for West Coast requirements, and having somewhat the same general characteristics. It is low freezing. The precautions against water are the same as for Du Pont Stumping Powder.

ARCTIC DYNAMITE—All Arctic Explosives can be packed in any size cartridges from 1-¼ inches in diameter up. It can also be packed in bulk. It is free running. It is well adapted to blasting in quarries when "well drills" are employed, where large diameter cartridges or bulk packing is of advantage. Strengths of the five different grades of Arctic Powder compared with equal weights of other standard dynamites are as follows: Artic No. 4, equivalent in strength to 45% dynamite. Arctic No. 5, equivalent in strength to 40% dynamite. Arctic No. 6, equivalent in strength to 30% dynamite. Arctic No. 7, equivalent in strength to 25% dynamite.

Arctic Dynamite is a non-freezing explosive.

PERMISSIBLE EXPLOSIVES

DU PONT PERMISSIBLE EXPLOSIVES are: Monobel Nos. 1, 2, 3, 4, 5 and 6, and Carbonite Nos. 1, 2, 3 and 6, and Duobel and Duobel No. 2.

MONOBEL NO. 1 is a permissible explosive, used principally for rock work, trimming and for blasting out the "bone" in coal mines where permissible explosives are required to be used. It may also be used with advantage in narrow seams of very hard coal.

MONOBEL NO. 2 AND MONOBEL NO. 4 (Monobel No. 4 is Low Freezing) are intended for use in hard coal, hard-shooting soft coal and coking coal. They are also used for blasting bottom and top rock, but are not quite so quick acting as Monobel No. 1. Because of their slower action they usually give better results in blasting lump coal. Monobel No. 2 and Monobel No. 4 are as strong as the same weight of 50 per cent. strength dynamite, but, being much lighter, there are about one-third more cartridges to the case.

MONOBEL NO. 3 AND MONOBEL NO. 5 are the slowest acting of the Monobel Explosives and are especially adapted to mining screened coal. They are just as strong as Monobel No. 2 and Monobel No. 4, but are so much slower in their action that miners who have learned to use them properly can mine the softest coal known without breaking it any more than if blasting powder were used and at no more expense. Monobel No. 5 is low freezing. Monobel No. 3 must be thawed when frozen.

MONOBEL NO. 6 is a low freezing grade of Monobel, slightly slower than Monobel No. 1, but quicker and more shattering in its action than Monobel No. 2. It is practically fumeless, does not require thawing, except under severest weather condition, and can be successfully used in shooting hard coal and coking coal where an explosive but little quicker than Monobel No. 2 and Monobel No. 4 is desired.

DUOBEL is a new permissible explosive of the MONOBEL type, but is much bulkier and therefore distributes the blow of the explosives more. It can be used successfully for medium and hard bituminous coal where lump coal is desired. It is not low freezing.

Duobel gives less smoke and objectionable fumes than any other permissible we make.

DUOBEL NO. 2 is a permissible similar in all respects to Duobel, but having the additional advantage of being low freezing.

CARBONITE NO. 1 is intended for the same kind of work as Monobel No. 2. It makes a little more smoke and fumes than Monobel does but stands water better. It is not quite so strong as Monobel No. 2.

CARBONITE NO. 2 is not quite so strong nor quick as Carbonite No. 1. It does not shatter the coal as much as Carbonite No. 1 and can be used more satisfactorily in a softer coal or where it is desired to make more lump coal. It is similar to Carbonite No. 1 in respect to fumes and water resistance. Carbonite No. 5 is low freezing.

CARBONITE NO. 3 and CARBONITE NO. 6 are slower and less shattering even than Carbonite No. 2 and Carbonite No. 5. They are intended for very soft coal and are among the most popular of Du Pont Permissible Explosives. Carbonite No. 6 is low freezing.

CARBONITE NO. 7 is similar to Carbonite No. 6 except that it is more bulky, that is, it runs more cartridges to the case and distributes the explosive force over a greater length of bore hole and is more adapted for producing lump coal in soft formations.

LOW EXPLOSIVES

DU PONT R. R. P. is a black, granular, free-running explosive packed in paraffine paper bags containing 12½ pounds each, and packed four bags to the 50-pound case. It is low freezing and requires no thawing except when long exposed to severe weather conditions. It is used extensively for stripping and on railroad construction work in both rock and earth. It resists water poorly, and requires a detonator of at least 5 pounds of 40 per cent. Straight Dynamite for every 25 pounds of Du Pont R. R. P.

DU PONT F. is a black granular powder slightly stronger than Du Pont R. R. P. It is packed in cartridges and is somewhat more water resisting. It is also low freezing. It is suitable for open work in soft and shaly ground.

DU PONT FF is similar to Du Pont F. but stronger and quicker.

DU PONT FFF is similar to Du Pont FF, but is still stronger and quicker.

BLACK BLASTING POWDER

BLACK BLASTING POWDER is a slow-acting black granular explosive made in standard granulations varying from coarse to fine—the finer granulations being quicker in action than the coarse. The nature of the blasting work determines the choice of granulation. It is deflagrating powder and cannot be detonated. Blasting Powder is made in two kinds—A and B.

"A" BLASTING POWDER is made of sulphur, charcoal and potassium nitrate. It is a little denser, a little stronger and a little less hygroscopic than B Blasting Powder. There are five standard granulations: C, FF, FFFF, 5 F and 7 F.

"B" BLASTING POWDER is made of sulphur, charcoal and sodium nitrate. It is affected by moisture a little quicker than "A" Blasting Powder. There are seven standard granulations: CCC, CC, C, F, FF, FFF, FFFF.

FUSE POWDER is a very fine grained potassium nitrate powder.

EXPLOSIVES FOR MILITARY USES

CANNON POWDER (Black and Smokeless)-Propelling Charge. Trinitrotoluol, Compressed Trinitrotoluol (T. N. T.), Picric Acid, Detonators, Nitrocellulose, Black Fuse Powder, Black Powder Pellets, Black Powder, Pyralin Discs.

Unclimbable factory fences and powerful electric weld factory gates, in chain link or other wire, erected 6', 7', 8' and higher. Thoroughly galvanized. Retains alignment.

Low and high chain link, woven wire, and other types of lawn fences, with electric weld wire-filled gates. Galvanized, strong, durable. Every type available for public or private installation.

Railings and Gates, made by a new exclusive process of electric weld. Pickets cannot fall—panels will not sag. Erected on brick, stone, iron or other columns, or upon Anchor Post Channel uprights.

Write, wire, or phone our Main Office or the Sales and Erection Office nearest you.

PLANT APPEARANCES ARE IMPROVED

—and many other advantages derived from an everlasting Stewart iron fence.

It is the ONE FENCE that miscreants cannot get through. Every picket is a bar of protection. It has proven its value to The Firestone Tire & Rubber Co., L. C. Smith Typewriter Co., Procter & Gamble Co., Bullock Electric Co., and hundreds of other industrial plants.

Railroads are extensive users of Stewart's iron fence for right-of-way, inter-track, concourse, street protection, depot sheds, etc.

That's a File!

The involuntary, enthusiastic verdict of every man who is experienced in filing—"That's a File," when he tries a NICHOLSON FILE. The more he expects of a file, the more he value its fast, smooth cutting from the first stroke.

NICHOLSON FILES

are made in the world's largest file factory. Inventive genius, exact science and perpetual, pervading care contribute to the production of ready-sharp, 100% UNIFORM files of 6,000 kinds—a NICHOLSON FILE for every purpose.

WATER PURIFIED

FOR EVERY INDUSTRIAL AND DOMESTIC USE

WATER SOFTENERS

Our "WE-FU-GO" and "SCAIFE" Systems of intermittent and continuous water purification can be adapted to every requirement.

The U. S. Steel Corporation is purifying its water supply with our apparatus in over 40 of its plants.

WATER FILTERS

We design and build both Pressure and Gravity Filters for Municipalities or Factories.

Our Domestic Filters are installed in the most prominent Residences, Hotels, Office Buildings and Factories all over the United States.

Kelly's Directory of
Merchants, Manufacturers and Shippers of the World

An Export and Import Guide

(In Two Volumes)

Contains lists of Importers, Exporters, and Manufacturers, together with kindred trades, throughout the world, arranged geographically and classified by trades. In addition it is an abridged gazetteer of reliable information as to population, topography, finance, trade, manufacture and other data of vital interest to buyers and sellers.

Kelly's Customs Tariffs of the World

A Companion Book to the Directory

Contains the Tariffs of the whole world, with various information connected therewith, is printed in the English language and carefully arranged by the Publishers for quick and easy reference. Also has commercial maps of each country, conversion tables of weights and money and other information of value to exporters and shippers.

Price $10.00 **Combination—Both Books $30.00**

As Buying and Selling Guides for Exporters and Importers these publications have been widely used and highly esteemed throughout the world since 1878. All houses wishing to establish, maintain, or handle Export and Import Trade should use them.

As an Advertising Medium they are excellent, the paid circulation being distributed in every part of the world first class results are invariably obtained.

Directories of every description and other Works of Reference covering England, Scotland, Ireland and Wales

Directories of South Africa, Australian States and New Zealand

Kreodone Interior Wood Block Floors

KREODONE BLOCKS form the best heavy duty floor that has ever been developed.

For more than twenty years they have stood without an equal for durability and economy.

Made from the best of long-leaf yellow pine. Preserved with the highest grade of pure creosote oil on the market. They never bleed tar.

Write us for particulars and figures.

CHAMPION DROP FORGINGS

Champion Drop Forgings are the result of a full appreciation by Champion Engineers and craftsmen of the engineers' opinion of the importance of accuracy, strength and balance. Hiding no weakness—no variations in stamina, Champion Drop Forgings are daily demonstrating their serviceability in thousands of cars, trucks, tractors, and general industrial machines which are known far and wide for high mechanical perfection. When buying forgings consider this tangible service—this organization that absorbs your opinions and achieves a definite result. Write or wire for a Champion Engineer or send us your blue prints and specifications.
